Responsible Refrigeration

True has always taken the impact refrigeration has on the climate seriously. We recognise that it is our responsibility to encourage and support our customers in selecting refrigeration products that are both sustainable and environmentally friendly.

At True, we are continually searching out environmentally friendly components and processes that will reduce our carbon footprint. This process encapsulates both our approach to manufacturing as well as our approach to the performance of our equipment.

Peace of Mind

At True, we believe operators should view the standard warranty offered by a manufacturer as an indicator of their own confidence in the long term viability of their product.

Therefore we offer for Products from True's North American Foodservice divisions and shipped from True's manufacturing facilities, as standard, a comprehensive 7 Years Labour & Parts & Compressor Warranty.
